

Communicable Disease Screen Instructions for Applicant/Employee:

Our registered nurse has determined after reviewing your communicable disease questionnaire that in order for you to begin to provide personal care client services or to continue to provide personal care client services, you must arrange for a clinically apparent communicable disease screen from a health care provider.

Please do the following:

- ❖ Please make an appointment with a nurse, physician assistant or physician of your choice to conduct a clinically apparent communicable disease screen.
- ❖ Please give the enclosed Letter to a Health Care Provider who conducts the communicable disease screen.
- ❖ Please either have the health care provider sign the bottom of the Letter to Health Care Provider or provide you with other documentation certifying that you are free of clinically apparent communicable disease. Forward this to your Liaison Supervisor as soon as possible.
- ❖ GeminiCares will pay for the cost of the screen. We can reimburse the health care provider directly or reimburse the applicant/employee if the applicant/employee paid the cost directly. Please note that in order to reimburse an applicant/employee directly, we will need paper documentation indicating the services provided and cost.

Please note that by law you must have this screen completed and return the documentation in order for you to provide services to personal care clients. If you are an applicant/new employee and you fail to complete this requirement, you will not be placed with personal care clients. If you are an existing employee, you will be removed from personal care clients.

Thank you for your assistance.
